Old Bridge Acupuncture and Wellness, LLC Consent to Treatment & Informed Consent

Please take time to read this form, which will provide you with some basic knowledge about acupuncture and Oriental Medicine.

Acupuncture is performed by the insertion of pre-sterilized, disposable acupuncture needles through the skin, and/or the application of heat or electrical stimulation to certain points on the body. Your acupuncture treatment may be combined with tui-na/acupressure, Chinese herbs, dietary therapy, moxibustion, cupping, electric or microcurrent stimulation, infrared heat lamp, and/or therapeutic exercises based on the fundamentals of Chinese Medicine. Your practitioner will explain the nature of each type of treatment as needed.

Other important things to keep in mind regarding acupuncture treatment:

- While the needles are in place, do not change your position or move suddenly.
- Wear comfortable, loose clothing.
- Maintain good personal hygiene.
- Avoid treatment when excessively fatigued, hungry, full, or emotionally upset.
- We are unable to treat patients who are intoxicated and /or are abusing substances.

Acupuncture is generally very safe. Although rare, certain side effects may result from acupuncture and each procedure or treatment has specific risks and benefits. While receiving acupuncture treatment, please feel free to communicate with your practitioner what you experience during the needling process, as this will enable the practitioner to adjust needles and the points selected to maximize your comfort during the treatment. If you experience dizziness, nausea, a cold sweat, shortness of breath, or faintness during treatment, please let the practitioner know immediately. This is known as needle shock, and while its occurrence is extremely rare, it helps to let the practitioner know if you experience any of these symptoms so that the needles can be removed. These symptoms go away immediately after needles are withdrawn, and are generally caused by anxiety when receiving acupuncture for the first time. Other possible side effects of acupuncture treatment may include local bruising, mild pain in the area treated, brief generalized fatigue, tingling or numbness. Other potential risks from acupuncture are very rare. These risks include infection, bleeding, or pneumothorax (e.g. collapsed lung). We only use sterile needles one time, so the risk of infection is minimal and extremely rare.

It is important that you advise the acupuncturist if you are on any blood thinning medication, if you have an implanted pacemaker, if you are pregnant and/or you have a history of epilepsy/seizure. Intial:

Direct Moxibustion: I understand that if I receive direct moxibustion as part of therapy, there is a risk of burning or scarring from its use. I understand that I may refuse this therapy.

Chinese Herbs/ Herbal Medicines/ Dietary Supplements: I understand that substances from the Oriental Materia Medica or otherwise may be recommended to me to treat bodily dysfunction or diseases, to modify or prevent pain perception, and to normalize the body's physiological functions. I understand that I am not required to take these substances but must follow the directions for administration and dosage if I do decide to take them. I am aware that certain adverse side effects may result from taking these substances. These could include, but are not limited to: changes in bowel movement, abdominal pain or discomfort, and the possible aggravation of symptoms existing prior to herbal treatment. *Should I experience any problems, which I associate with these substances, I agree to suspend administration and contact Old Bridge Acupuncture and Wellness, LLC as soon as possible.*

Acupressure/Tui-Na Bodywork/Cupping: I understand that I may also be given acupressure/tui-na bodywork or cupping as part of my treatment to modify or prevent pain perception and to normalize the body's physiological functions. I am aware that certain adverse side effects may result from these treatments. These could include, but are not limited to: bruising, sore muscles or aches, and the possible aggravation of symptoms existing prior to treatment. I understand that I may stop the treatment if it is too uncomfortable.

Please inform your practitioner if you have any of the following conditions:

- **If you are pregnant and/or breastfeeding**
- **If you have ever experienced seizures, fainting or panic attacks**
- **If you have a pacemaker or any other electrical implants**
- **If you have HIV/AIDS, hepatitis or a sexually transmitted disease (STD)**

Everyone responds to treatment differently therefore, we cannot guarantee the outcome. Some individuals experience total or partial relief of their pain or symptoms after the first few treatments. Others notice steady, gradual improvement. In some cases, no relief is felt at all until after several weeks. Occasionally, some people notice that their pain actually seems to be worse before it gets better. Let us know how you responded to the previous treatment at the time of your follow-up visit(s), so that your treatment plan can be adjusted accordingly. Depending on your condition and your goal for treatment, we may require a physician referral in order for you to continue treatment in our clinic. In addition, clients are responsible for seeking the advice and treatment of a physician should their symptoms change, or if any new condition(s) arise.
